CAREER OBJECTIVE

Aspiring software developer with solid programming and analytical skills, seeking to contribute to impactful real-world projects while continuously learning, adapting to new technologies, and advancing in a dynamic technical environment.

SKILLS

- **Frontend:** HTML, CSS, JavaScript, ReactJS, Redux
- **Backend:** Java, Python, Next js, node js
- **Programming Languages:** Java, JavaScript, Python, C, C++
- **Database:** MySQL, DBMS
- **Tools & Platforms:** Git, GitHub, VS Code, Figma, pycharm
- **Core Concepts:** Data Structures & Algorithms, OOPS, Operating Systems, Computer networks
- **soft skills:** leadership, teamwork, adaption, communication

CERTIFICATIONS

Programming for Everybody (Getting Started with Python)

- University of Michigan via Coursera — Feb 2024

Introduction to MongoDB for Students

- MongoDB University — Jun 2024

Introduction to Industry 4.0 and Industrial Internet of Things

- NPTEL (IIT) — Jul-Oct 2024 | Score: 72%

Cloud Computing

- NPTEL (IIT) — Jan-Apr 2025 | Score: 71

Oracle Cloud Infrastructure 2025

- Certified Generative AI Professional — Oct 2025

ACHIEVEMENTS

2nd Prize - Poster Presentation, Sona College: 500 for clarity and innovation.

2nd Prize - THIRAN'25 | 1500 - for innovative use of technical and AI tools in a competitive event.

3rd Prize - Poster Presentation, Gnanamani Institute, Recognized for technical clarity.

3rd Prize - Web Design and Development

Participant - 24-Hour Hackathon, Developed a working prototype at Dr. Ambedkar Institute, Bangalore.

Finalist - Smart India Hackathon Grand Finale 2025 (Government Of Odisha Problem Statement)

PROJECTS

Smart Dustbin with Alert System

- **Objective:** Automate waste management using IoT.
- **Description:** Designed a smart dustbin that sends alerts when full, helping reduce fuel usage and support cleaner environments.

Rain Alarm Notification System

- **Objective:** Provide early rain alerts for timely action.
- **Description:** Developed a system that detects rainfall and sends instant notifications, useful for households and farmers.

Automatic Attendance System Using Face Recognition

- **Objective:** Automate student attendance using AI.
- **Description:** Created a face recognition system that marks attendance accurately, reducing manual effort and errors.

Agri Diagnosis - Crop Yield Prediction Web Application

- **Objective:** Provide farmers with accurate crop yield insights.
- **Description:** Developed a web app that predicts crop yield using weather and soil data, offering basic recommendations for better farm decisions.

Infinity Finds - E-Commerce Website

- **Objective:** Develop an online platform to sell my own handcrafted products.
- **Description:** Built an e-commerce website for selling my own handmade bracelets and polaroids, featuring user authentication, product listings, and a smooth, user-friendly interface.

Job Portal - React-Based Job Search & Recruitment System

- **Objective:** Enable efficient job discovery and application management.
- **Description:** Created a modern job portal using React with features such as user login/signup, dynamic job listings, applicant tracking, and recruiter dashboards. Integrated REST APIs for real-time job updates and implemented search + filter logic for better user experience.

INTERNSHIPS

- **CODSOFT** - WEB DEVELOPMENT INTERN
MARCH 2024 - APRIL 2024
- **TECHNOHACKS** - WEB DESIGN AND DEVELOPMENT INTERN
DECEMBER 2024 - JANUARY 2025
- **WSPL** - FULL STACK DEVELOPER INTERN
JUNE 2025 - JUNE 2026

EDUCATION

- **B.Tech (Information Technology)** | Knowledge Institute of Technology 2023-2027 |
cgpa: 8.6
- **HSC** | Model School, Veerapandi | 2022-2023 | **Mark Percentage: 91.1%**
- **SSLC** | Lotus Matric Hr. Sec. School | 2020-2021 | **Mark: All pass**

PERSONAL DETAILS

FATHER'S NAME: SHANMUGA KUMAR
